1	This was a very well organized training. The use of technology was excellent, especially given that you were connecting remotely to the presenter as well as to participants, switched to conference materials seamlessly, managed the questions, etc. The clinical content was extremely well organized and reflected Dr Jordan's profound understanding of work with suicide survivors and with grief therapy. The	2/5/2021 11:11 AM
2	I was wondering about the impact of culture and race in both research on Suicide and approaches and how/if they differ.	2/5/2021 8:46 AM
3	Appreciated your deep knowledge of grief work and psychotherapy very much. Your training was not about what to do but how to witness, listen, and understand people's suffering and healing. Hearing from someone like you who have extensive knowledge and experiences that psychotherapy including grief work does not have to be all about what modalities you use but it's about your presence and you can genuinely care and be authentic in the therapeutic relationships really resonates with my approach and appreciated very much for the assurance. Thank you.	2/4/2021 1:09 PM
4	This training was very useful. It provided a lot of information in a short time. My only suggestion would be to hold questions to a certain time as it can distract from the presentation.	2/1/2021 3:12 PM
5	A great training! The video case study was extremely helpful in seeing how the clinical work is done with a survivor over a course of several sessions. I'm very pleased for the opportunity to learn from Dr. Jordan.	2/1/2021 12:32 PM
6	It was great. Thank you for all the wonderful trainings you have.	1/30/2021 11:35 AM
7	The training was grounded in theory and many research citations were provided and discussed in detail during the training. The video was extremely helpful in making elements of the interventions more concrete. The stories shared were powerful and Dr Jordan provides excellent examples of how to meet clients where they are. One improvement could be examples of a couple of other case studies. Most time was focused on the case related to the video.	1/28/2021 3:52 PM
8	Nothing I can think of	1/27/2021 9:23 AM
9	I really enjoyed this training. I don't see a need for improvements	1/27/2021 2:41 AM
10	Very informative and practical content	1/25/2021 7:52 AM
11	the 2 day training worked well for my schedule.	1/19/2021 7:22 PM
12	The video of the real-world example was extremely helpful. It would also be helpful to see other examples if possible.	1/19/2021 10:58 AM
13	Increase the training time, especially for questions. Overall, loved the training.	1/19/2021 9:38 AM
14	Hi- I am a LCSW with a Michigan License. All social workers were instructed to provide the 4 code words for the training, which were: Don't forget to breathe. I just wanted to be sure to capture that.	1/19/2021 9:35 AM
15	The video of the therapy client was remarkable and very helpful. The entire presentation was excellent and I would like to see it available as an on demand webinar for viewing again, or recommending to colleagues.	1/15/2021 4:37 PM
16	This can be a challenging topic in treatment. I really liked the way both effective and ineffective techniques were discussed. How John Jordan was able to tell us what he has done and why and why not it worked well. I find the hands on information from someone in the field so helpful.	1/15/2021 2:56 PM
17	This was a very worthwhile training. The videos were very helpful. I feel that both the trainer and facilitator did an excellent job conducting the training with the challenges of Zoom. Thank you!	1/15/2021 2:04 PM
18	Please add captions to the case videos	1/15/2021 9:42 AM

35	The video recordings were very helpful in seeing how the materials and training content is used in practice with a client. I would suggest breakout rooms with participants to discuss the content and feedback on the videos. I'm not sure this can be done in webinar format, but maybe something to consider. Thank you!	1/14/2021 12:47 PM
